

Compatible Accessories

Extrusion + Lens + End Cap

JK02 + JK02-SL + JK02-EC

Compatible Control System

DMX Decoder

DDMX4C-120V

DMX Controller

CDMX4C

DMX Controller

CDMX128C

DMX Controller

CDMX1024C

Warnings

Do not bend at sharp 90°

Minimum bending diameter > 4"

Only use flat head screw

Installation: 120V RGBW Tapelight + Mounting Clip

1

Insert flat head screw into mounting clip

2

Screw mounting clip to surface

3

Secure 120V RGBW tapelight into mounting clip

Warnings

Do not bend at sharp 90°

Minimum bending diameter > 4"

Only use flat head screw

Installation: 120V RGBW Tapelight + Extrusion + Lens

1

Use flat head screw to screw extrusion onto surface

2

Secure 120V RGBW tapelight inside extrusion

3

Snap lens on top of extrusion

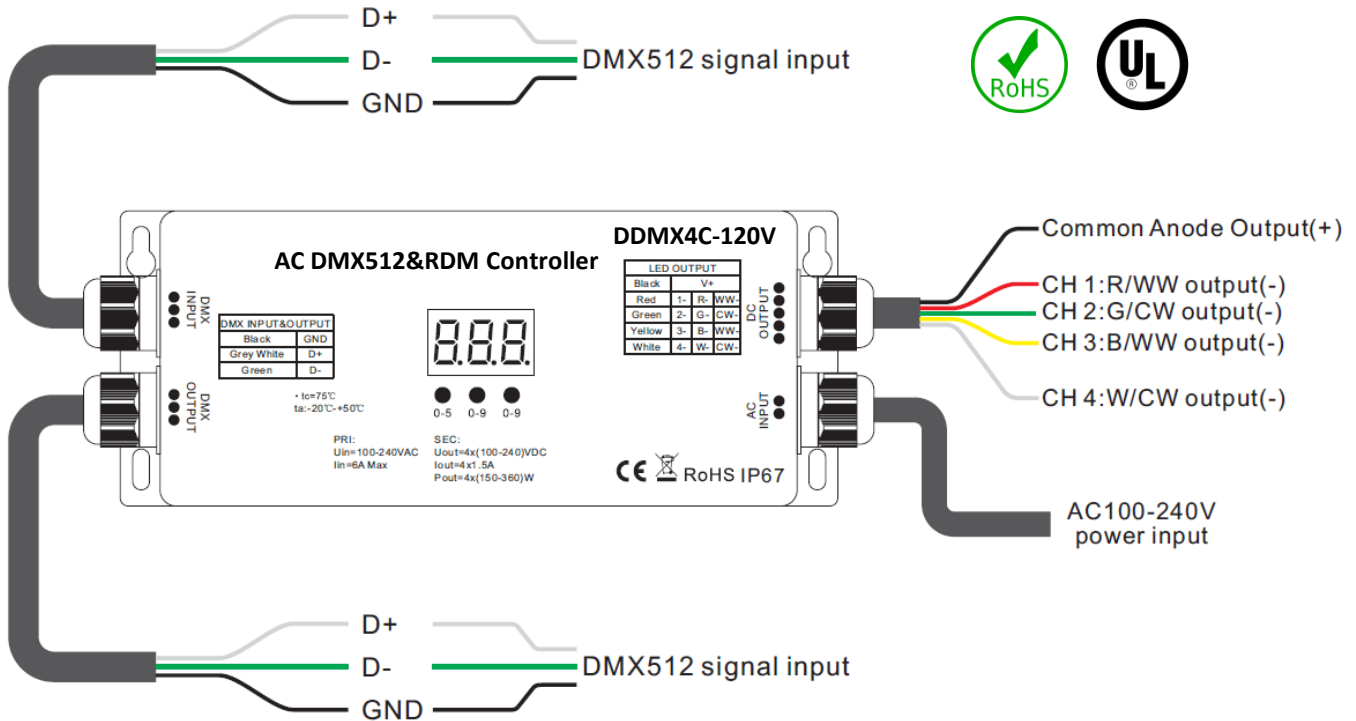

4

Adhere end caps on both sides of extrusion

DMX/RDM 120V / Line Voltage LED Tape Controller (DDMX4C-120V)

Important: Read All Instructions Prior to Installation

Input Voltage	Output Voltage	Output Current	Max Load	Size (L x W x H)	Ambient Temp.
AC 100-240V	DC 100-240V	Max. 4 x 1.5A	720W @ 120V	7.11" x 2.9" x 1.5"	-4°F to +122°F

- RDM enabled DMX high voltage LED strip controller
- Output for high voltage DC100~240V LED Strip
- Standard DMX512 compliant control interface
- RDM function enabled to realize intercommunication between DMX master and decoder.
- For example, DMX decoder's address can be assigned by DMX master console
- With digital display showing data directly, it is easy to set and show DMX address.
- Total 4 channels LED output, common anode
- DMX address manually settable
- DMX channel quantity from 1CH~4CH settable
- Output PWM frequency from 500HZ ~ 35K HZ settable, but do not set higher than 3KHz.
- Output dimming curve gamma value from 0.1 ~ 9.9 settable
- Waterproof grade:IP67

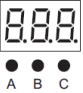

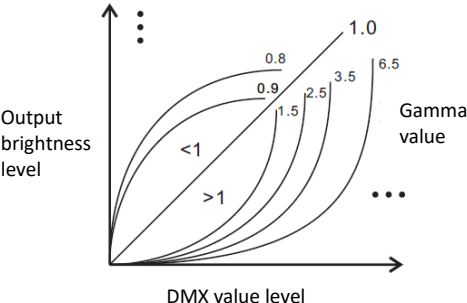

Safety & Warnings

- DO NOT install with power applied to device.
- This device is IP67 rated and protected against damp environment.

DMX/RDM 120V / Line Voltage LED Tape Decoder (DDMX4C-120V)

Important: Read All Instructions Prior to Installation

Operation

	<p>To set desired DMX512 address through buttons</p> <ul style="list-style-type: none"> ▪ button A is to set “hundreds” position, ▪ button B is to set “tens” position, ▪ button C is to set “unit” position.
	<p>Set DMX address (Factory default DMX address is 001) Press and hold down any of the 3 buttons for over 3 seconds, digital display flashes to enter into address setting, then keep short pressing button A to set “hundreds” position, button B to set “tens” position, button C to set “units” position, then press and hold down any button for >3 seconds to confirm the setting.</p>
	<p>DMX signal indicator ● : When DMX signal input is detected, the indicator on the display following after the digit of “hundreds” position of DMX address turns on red </p>
	<p>Choose DMX Channel Press and hold down both buttons B+C simultaneously for over 3 seconds, CH digital display flashes, then keep short pressing button A to choose 1/2/3/4, which means total 1/2/3/4 channels. Press and hold down button A for >3 seconds to confirm the setting. Factory default is 4 DMX channels. (Factory default DMX channel is 4CH) For example, the DMX address is already set as 001.</p> <ul style="list-style-type: none"> ▪ 1CH=1 DMX address for all the output channels, which all will be address 001. ▪ 2CH=2 DMX addresses , output 1&3 will be address 001, output 2&4 will be address 002 ▪ 3CH=3 DMX addresses, output 1, 2 will be address 001, 002 respectively, output 3&4 will be address 003 ▪ 4CH=4 DMX addresses, output 1, 2, 3, 4 will be address 001, 002, 003, 004 respectively
	<p>Choose PWM frequency (Factory default PWM frequency is PF1 1KHz) Press and hold down both buttons A+B simultaneously for over 3 seconds, digital display will show PF1, PF means output PWM frequency, the digit 1 will flash, which means frequency, then keep short pressing button C to select a frequency from 0-9 and A-J, which stand for following frequencies: 0=500Hz, 1=1KHz, 2=2KHz, ..., 9=9KHz, A=10KHz, B=12KHz, C=14KHz, D=16KHz, E=18KHz, F=20KHz, H=25KHz, J=35KHz. Then press and hold down button C for >3 seconds to confirm the setting. Note: DO NOT set the PWM frequency higher than 3KHz to avoid overheat and damage to the device.</p>
	<p>Choose Dimming Curve Gamma Value Press and hold down all buttons A+B+C simultaneously for over 3 seconds, digital display flashes g1.0, 1.0 means the dimming curve gamma value, the value is selectable from 0.1-9.9, then keep short pressing button B and button C to select corresponding digits, then press and hold down both buttons B+C for >3 seconds to confirm the setting.</p>

120V RGBW Decoder Wiring Diagram

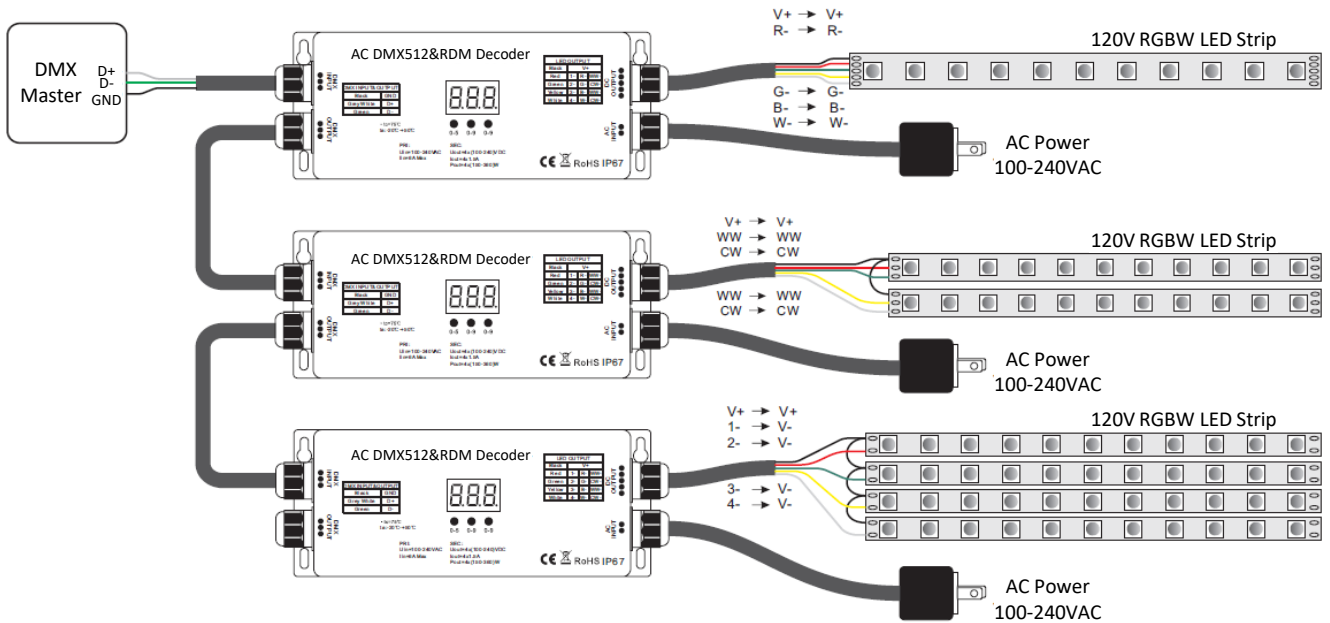

DMX/RDM 120V / Line Voltage LED Tape Decoder (DDMX4C-120V)

Wiring Diagram

Restore to Factory Default Setting

Press and hold down both buttons A+C for over 3 seconds until the digital display turns off and then turns on again, all settings will be restored to factory default. Default settings are as follows:

- DMX address: 001
- DMS address quantity: 4CH
- PWM frequency: PF1
- Gamma: g1.0

Product Dimension

Feature

- Touch Sensitive
- Glass interface
- Control 1 zone, save up to 4 color

Operation Voltage	Output Voltage	Dimension
12-24VDC	DMX512 Signal	3.38" x 3.38" x 1.15"

Feature

- Touch sensitive
- Glass interface(White & Black)
- Control 1 zone,save up to 4 color

Operation:

How to save color or mode

S1 S2 S3 S4 buttons can save the color from mode or save color when you touch color wheel or touch **R G B W** buttons.

Press ► button ,mode runs, see favorite mode---> press **S1** or **S2** or **S3** or **S4** on over 3 seconds until connected light flashes. Then it saved successfully.

Touch color wheel or touch color temperature button or touch any **R G B W** buttons----> see favorite color---> press button over 3 seconds until connected light flashes. Then it saved successfully

How to recall color or mode?

Touch S1/S2/S3/S4 directly.

Safety Warnings:

- 1) The product shall be installed and serviced by a qualified person.
- 2) IP20.Please avoid the sun and rain. When installed outdoors, please ensure it is mounted in a waterproof enclosure.
- 3) Always be sure to mount this unit in an area with proper ventilation to avoid overheating.
- 4) Please check if the output voltage of any LED power supplies used comply with the working voltage of the product.
- 5) Never connect any cables while power is on and always assure correct connections to avoid short circuits before switching on.
- 6) Please ensure that the cable is secured tightly in the connector
- 7) For update information please consult your supplier.

Warranty Agreement:

- 1) We provide lifelong technical assistance with this product:
 - 5-year warranty. We print date on every products, for example :1125 means year 2011,week 25.The warranty is for free repair or replacement and covers manufacturing faults only.
 - For faults beyond the 3-year warranty we reserve the right to charge for time and parts.
- 2) Limited Warranty
 - Any defects caused by wrong operation.
 - Any damages caused by unauthorized removal, maintenance, modifying, incorrect connection and replacement of chips.
 - Any damages due to transportation, vibration etc. after purchase.
 - Any damages caused by earthquake, fire, lightning, pollution and abnormal voltage.
 - Any damages caused by negligence, inappropriate storing at high temperatures and humidity or near harmful chemicals.
 - Product has been updated
- 3) Repair or replacement as provided under this warranty is the exclusive remedy to the customer.
